4	Changelog	9
5	Screenshots	11

Enables you to configure colours in your sites settings file to change the text colour in the DraftJS editor.

CHAPTER 1

Installation

Wagtail Colour Picker is available on PyPI - to install it, just run:

```
pip install wagtailcolourpicker
```

Once thats done you need to add the following to your `INSTALLED_APPS` settings:

```
INSTALLED_APPS = [  
    ...  
    'wagtailcolourpicker'  
    ...  
]
```

Go to your cms admin area and you will see a new icon in the DraftJS toolbar.

CHAPTER 2

Settings

Any settings with their defaults are listed below for quick reference.

```
# the icon in the DraftJS toolbar
WAGTAILCOLOURPICKER_ICON = [...]

# the colours to show in the picker window
WAGTAILCOLOURPICKER_COLOURS = {
    'black': '#000000',
    'white': '#ffffff'
}
```

CHAPTER 3

Contributors

People that have helped in any way shape or form to get to where we are, many thanks.
